

LBN Global Track and Trace Option

Track Shipments app

December 9th, 2020

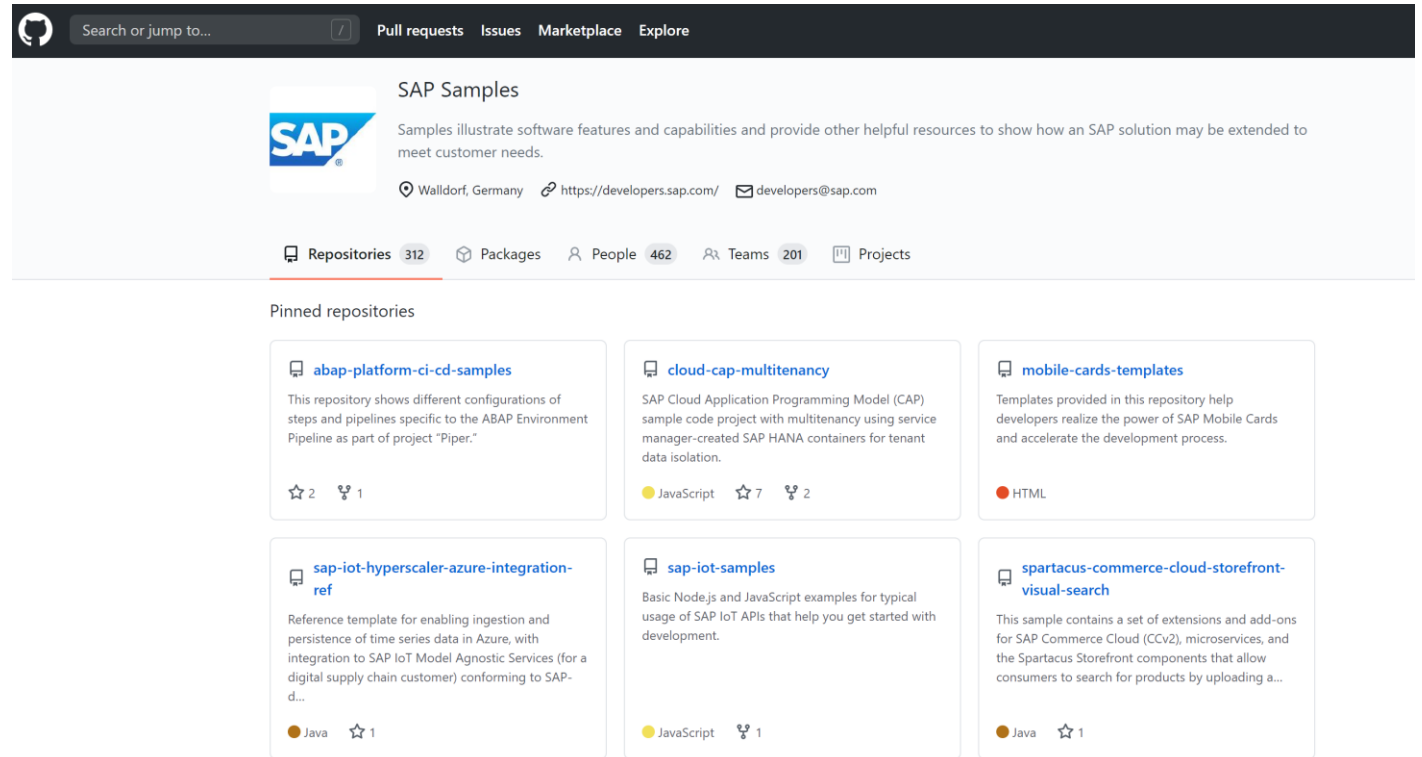

PUBLIC

Background Introduction

GTT Template apps* stand for codes, scripts, and associated documentation published by SAP to show GTT customers and partners how to use the global track and trace option. They can also accelerate customers' and partners' development of applications that are intended to work with the option.

Template apps for LBN global track and trace option

- Track Sales Orders app
- Track Shipments app
- Track Purchase Orders app
-

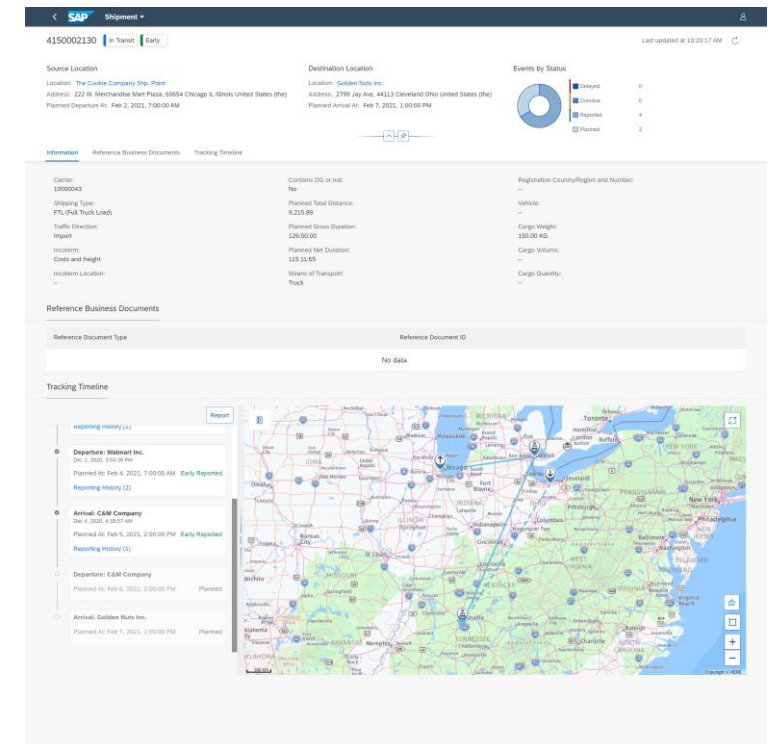

Track Shipments App

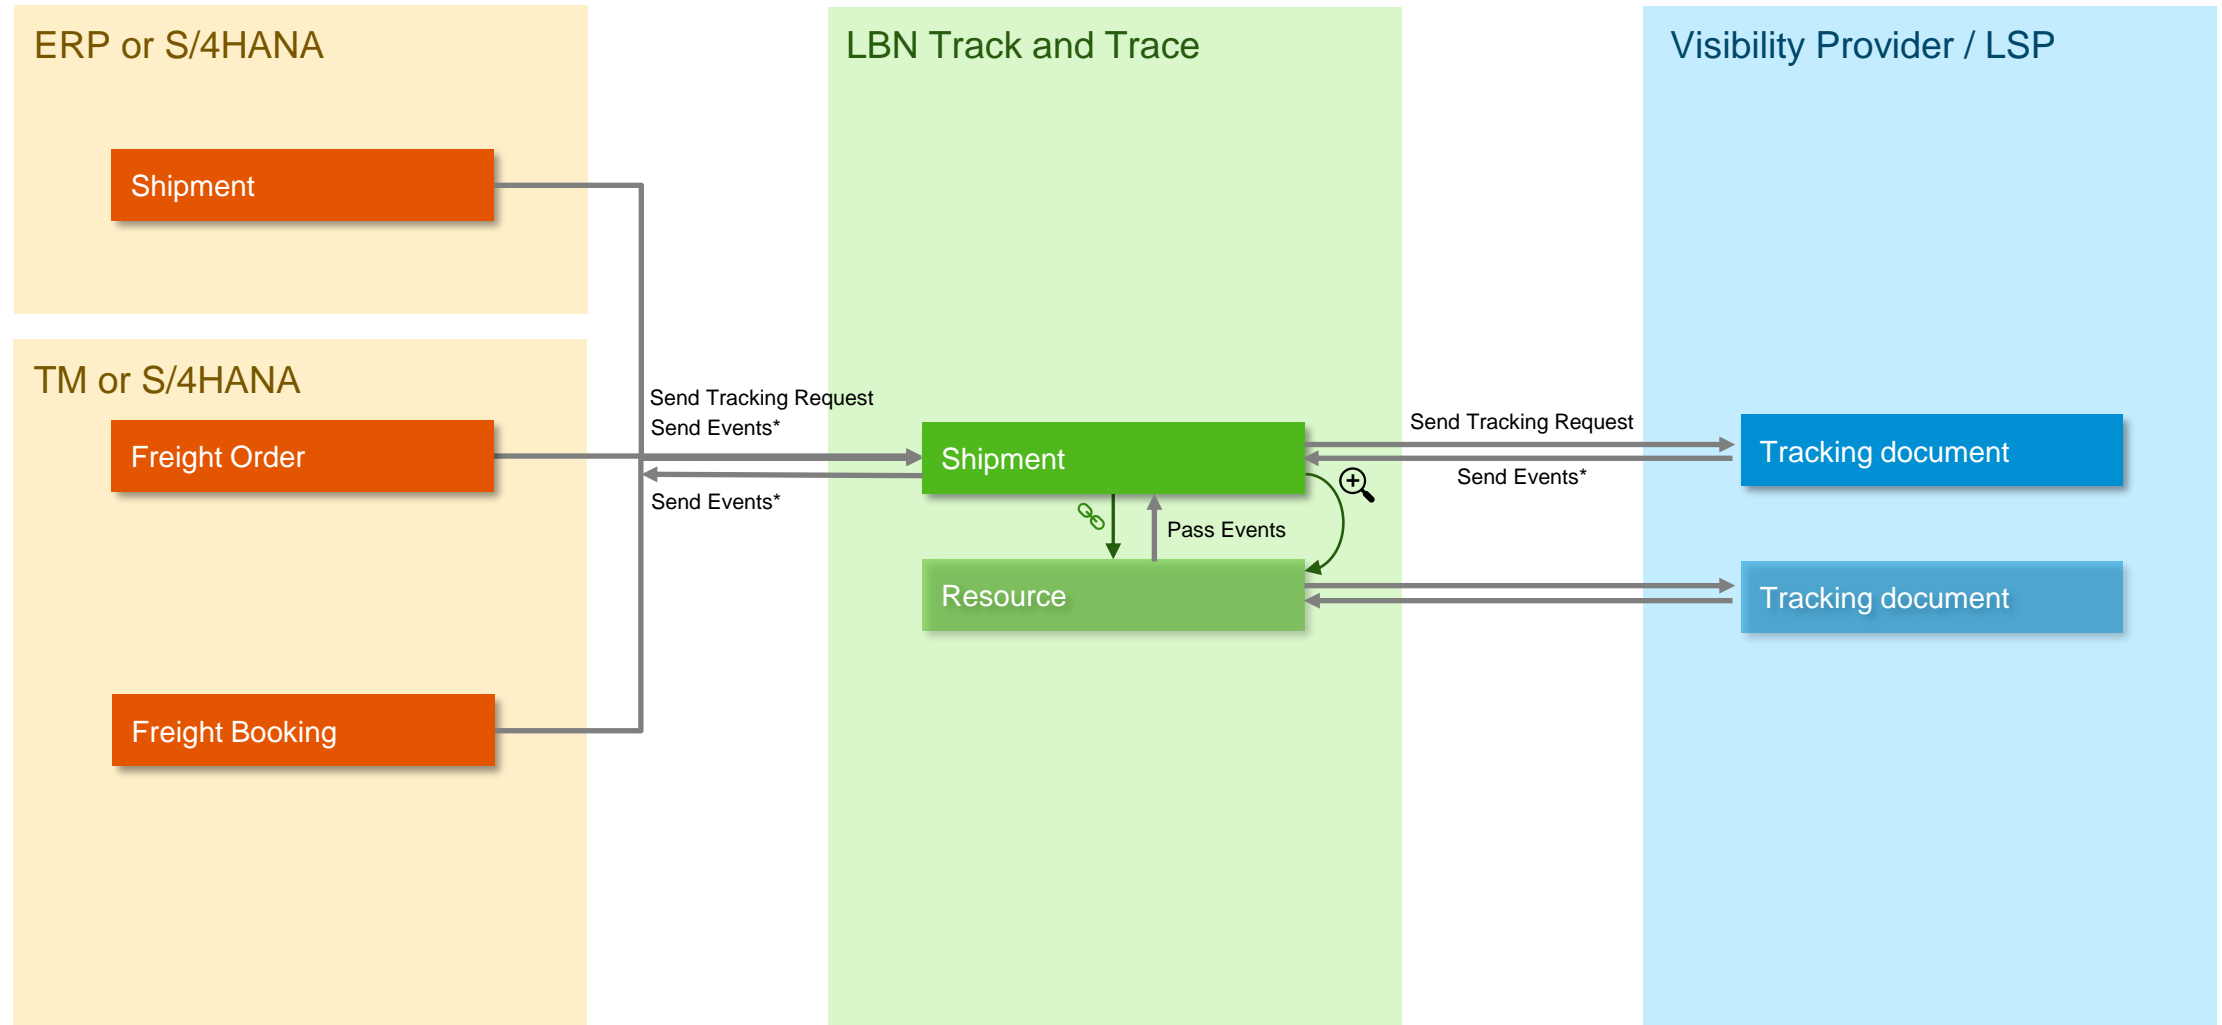

Introduction

Track Shipments app is for **transportation planners** to track the execution status of shipments, road freight orders or ocean freight bookings and **report events manually**. It answers following questions:

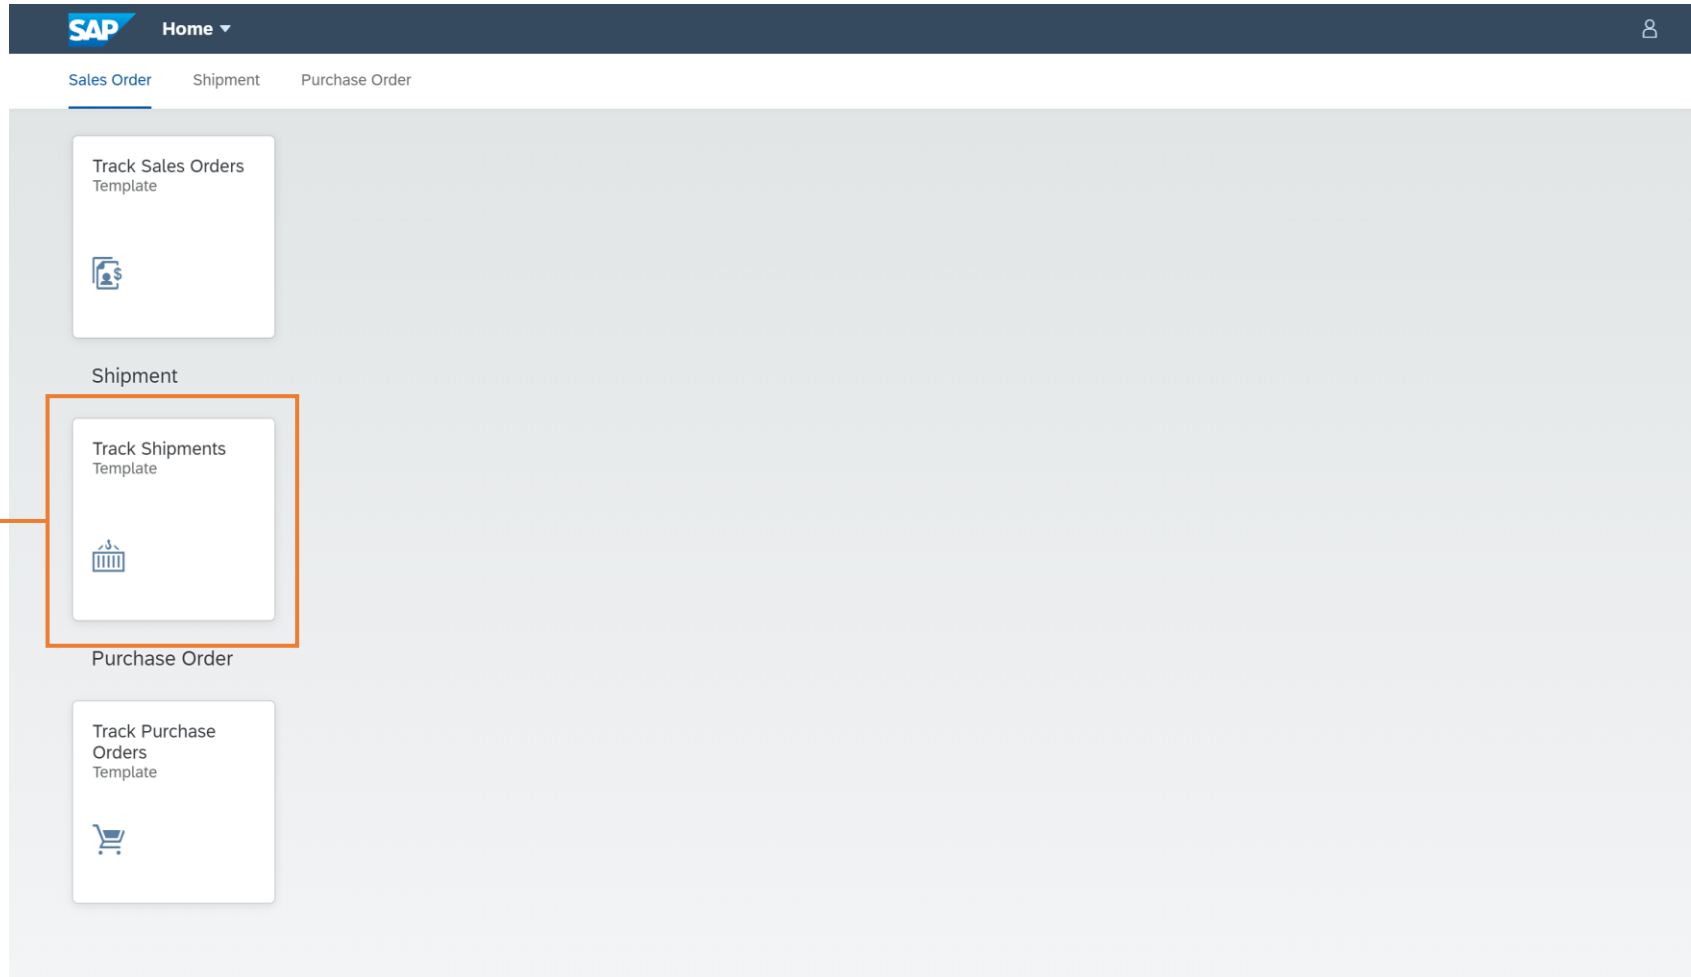

- Where is my shipment/road freight order/ocean freight booking?
- Has my shipment/road freight order/ocean freight booking been executed?
- What is the **next stop** of my shipment/road freight order/ocean freight booking?
- What is the **ETA** of my shipment/road freight order/ocean freight booking?

Tracked Process Modeling in Track Shipments App

Select from shipment model's admissible unplanned event list to report unplanned event, corresponding user defined fields will be shown based on your selected event type.

Execution Status

By default, the shipment's execution status is “**Not Started**”.

If the shipment's planned event is reported, the execution status will be changed to “**In Transit**”.

If the shipment's all planned PODs are reported, the execution status will be changed to “**Completed**”.

Once the execution status is set as “**Completed**”, it cannot be changed any more.

You can set your own execution status logic in Event-to-Action script.

Report Event from Visibility Provider to GTT

The following event types are supported.

- Delay
- Location Update
- Departure
- Arrival

Report Event from TM to GTT

The following event types are supported:

- Departure
- Arrival
- Loading Start
- Loading End
- Unloading Start
- Unloading End
- Coupling
- Decoupling

Synchronize Event from GTT to TM

The following event types are supported. You can only report a planned event or a delayed event that is referred to a planned event in TM.

- Delay
- Departure
- Arrival
- Loading Start
- Loading End
- Unloading Start
- Unloading End
- Coupling
- Decoupling
- POD
- POPU

Thank you.
